Job Description

Company Introduction:
We are a leading IT solutions provider delivering comprehensive and turnkey services to Japanese companies across both domestic and international markets. Our team of bilingual engineers and managers specialize in sophisticated IT solutions spanning Enterprise Applications (SAP), JAVA, Microsoft technologies, and open-source frameworks. Our client base includes industries in Japan, the United States, the Middle East, and India, where we ensure high-quality service delivery.

We are also expanding into emerging technologies such as Blockchain, AI/ML, Analytics, IoT, and Business Process Automation. In addition, we build dedicated teams for clients using the Build/Operate/Transfer (BOT) model. As a key player in the Japanese market, we bring the latest technologies from our group companies and provide worker dispatch and paid employment placement services.

Position Overview:
We are seeking a skilled AS/400 System Administrator with expertise in the IBM i (AS400) platform to join our team. The ideal candidate will have hands-on experience in system administration, including expertise in CL (Control Language), RPG (Report Program Generator), and COBOL. As part of a dynamic, bilingual team, you will be responsible for the management, tuning, and maintenance of AS/400 systems, ensuring their efficiency and reliability.

Key Responsibilities:

- **System Administration**: Manage and maintain the AS/400 (IBM i) platform to ensure optimal system performance.
- **Programming Support**: Work with programming languages including **CL**, **RPG**, and **COBOL** to support system operations and troubleshoot issues.
- **System Tuning**: Perform system tuning and optimization to enhance performance and reliability of the AS/400 platform.
- **Backup Management**: Oversee system backups and recovery processes to ensure data integrity and availability.
- **Monitoring & Troubleshooting**: Proactively monitor system performance, resolve system issues, and implement corrective actions.
- **Collaboration**: Work closely with other team members to support enterprise applications and resolve complex system problems.

Required Skills

Required Qualifications:

- Proven expertise in the **IBM i (AS400) platform**.
- Strong working knowledge of **CL (Control Language)**, **RPG (Report Program Generator)**, and **COBOL**.
- Experience in **system tuning**, backups, and overall system administration.
- A strong **N3-level proficiency** in Japanese is **required** for communication within the team and with stakeholders.
- Familiarity with **system troubleshooting** and performance optimization techniques.
- Ability to work independently as well as part of a bilingual, cross-functional team.
- Solid understanding of **security best practices** and data management principles.

Additional Information:

- **Work Environment**: On-site role based in **Osaka, Japan**.
- **Project Duration**: Full-time, long-term opportunity with potential for growth.
- **Language Requirement**: N3-level proficiency in Japanese is required for effective communication.
