Job Description

Company Introduction:
We are a leading IT solutions provider delivering comprehensive and turnkey services to Japanese companies across both domestic and international markets. Our team of bilingual engineers and managers specialize in sophisticated IT solutions spanning Enterprise Applications (SAP), JAVA, Microsoft technologies, and open-source frameworks. Our client base includes industries in Japan, the United States, the Middle East, and India, where we ensure high-quality service delivery.

We are also expanding into emerging technologies such as Blockchain, AI/ML, Analytics, IoT, and Business Process Automation. In addition, we build dedicated teams for clients using the Build/Operate/Transfer (BOT) model. As a key player in the Japanese market, we bring the latest technologies from our group companies and provide worker dispatch and paid employment placement services.

Position Overview:

We are looking for an experienced **Database Administrator (DBA)** with proficiency in **DB2/400** database administration. In this role, you will be responsible for the management, maintenance, and optimization of DB2/400 databases, ensuring smooth operations and high availability. The ideal candidate will have experience with **data migration**, **transformation**, **SQL**, and **stored procedures** on the AS/400 platform.

Key Responsibilities:

- **Database Administration**: Manage and maintain **DB2/400** databases, ensuring performance, security, and reliability.
- **Data Migration & Transformation**: Lead data migration and transformation efforts, ensuring smooth data transfer and integration across systems.
- **SQL & Stored Procedures**: Write and optimize **SQL queries** and **stored procedures** to ensure efficient data handling and system performance on AS/400.
- **Database Optimization**: Perform regular database tuning to optimize performance and minimize downtime.
- **Backup and Recovery**: Implement and maintain backup and recovery strategies to ensure data integrity and availability.
- **Monitoring & Troubleshooting**: Monitor database performance, troubleshoot issues, and provide timely resolutions to minimize disruptions.
- **Collaboration**: Work closely with other team members, including developers and project managers, to ensure seamless integration and functionality of database systems.

Required Skills

Required Qualifications:

- **Proficiency in DB2/400** database administration, including performance tuning, backup/recovery, and troubleshooting.
- Experience with **data migration** and **transformation** processes.
- Solid understanding of **SQL** and **stored procedures** in an AS/400 environment.
- **N3-level Japanese proficiency** is required to communicate with team members and stakeholders.
- Strong problem-solving skills and attention to detail.
- Ability to work independently and collaboratively in a bilingual team environment.

Additional Information:

- **Work Environment**: This is an **on-site** role based in **Osaka, Japan**.
- **Project Duration**: Full-time, long-term opportunity with potential for career growth.
- **Language Requirement**: **N3-level Japanese** proficiency is required for effective communication.
