Job Description

The Development Supervisor - Solar Projects will lead, manage, and oversee solar energy development projects in Japan, ensuring their successful completion within set timeframes and budget. This role is ideal for someone with a keen interest in energy and natural resources, a strong technical understanding of solar projects, and excellent leadership skills.

Client Details

Our client is a well-established organization in the energy and natural resources sector. With a strong focus on renewable energy, they are committed to creating sustainable solutions for the future. Their team is diverse and talented, with a passion for challenging the status quo and breaking new ground in the field of solar energy.

Description

- Oversee all aspects of solar project development, from initial planning to completion
- Lead and manage a team of engineers and technicians
- Ensure projects are completed within set timeframes and budgets
- Collaborate with stakeholders, including contractors and government agencies
- Develop and implement project management strategies and plans
- Monitor project progress and make necessary adjustments as needed
- Ensure compliance with industry standards and regulations
- Participate in industry events and stay abreast of latest trends and technologies

Job Offer

- A competitive salary ranging from 8,000,000 to 9,000,000 JPY
- Comprehensive benefits package, including insurance, commuting allowance, and pension
- Opportunity to work in a vibrant and innovative industry
- Chance to be part of a team passionate about renewable energy and sustainability

If you are ready for a new challenge in the energy and natural resources sector and believe you have what it takes to succeed in this role, we encourage you to apply.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Francois Fleury at +81 3 6832 8674.

Required Skills

- A strong technical understanding of solar energy and project development
- Strong project management abilities
- Great communication and negotiation skills
- A proactive approach and ability to solve complex problems
- A degree in a relevant field, such as engineering or energy management
