Job Description

【求人No NJB2278100】

About the role...

DevOps Engineer makes the SaaS offering possible by integration of code from Jenkins and deploying it in multiple environments on multiple clouds (AWS Azure or Google Cloud) using configuration management tool like Ansible. He is also trying to explore newer tools and techniques like Docker with Nomad and Kubernetes.

What you'll do for us...

Find yourself doing pretty much everything; writing infrastructure tests fixing automation workflows improving CI/CD building/deploying the latest code across environments learning new DevOps tools catching issues providing solutions to users. You should be willing to make sure on the availability of the infrastructure 24*7 to our customers.

Required Skills

What you'll have...

■Experience

- Experience: Having 5+ years of hands on experience in at least one of the cloud provider (AWS Azure Google Cloud) .
 - Experience in System administration and network
 - Python bash powershell scripting expertise is a must
 - Skills: Having C# .NET knowledge is helpful
 - Understanding of core concepts of Windows Linux for Administration troubleshooting
 - Adept at Configuration management: Ansible; Terraform Chef puppet
 - Proficient in CI/CD: Jenkins or similar
 - Docker; having familiarity with orchestration tools like Kubernetes Nomad Swarm is helpful
 - Elastic Cache cluster; familiarity in integrating with SIEM tools with ELK stack (elastic search logstash Kibana) is helpful
 - Having basic knowledge about how databases work; MS SQL Mongo
 - Able to develop and debug Custom Integration service tasks
 - Professional level of both English and Japanese language
 - We really value team spirit: Transparency and frequent communication is key. This is not limited by hierarchy distance or function
-
