### Job Description

About the Role:

We are looking for a technically skilled AV Engineer to join our Tokyo team. This role will support the implementation and

maintenance of AV systems across client sites, ensuring high standards of performance, reliability, and user experience. You will work hands-on with AV hardware, software, and networked systems, contributing to systemsGo's reputation for dependable and scalable AV deployments.

**Key Responsibilities:**

- Execute AV system installation, configuration, and testing based on design documentation.
  - Perform on-site troubleshooting, diagnostics, and maintenance.
  - Support commissioning and client handover processes.
  - Collaborate with consultants and project managers to align implementation with design intent.
  - Maintain accurate records of system configurations and service logs.
  - Provide user training and post-installation support as needed.
- 

## Required Skills

**Qualifications & Experience:**

- 3+ years in AV engineering, field service, or technical support.
- Proficiency in AV signal routing, DSP configuration, and control system setup.
- Familiarity with platforms such as Q-SYS, Crestron, Extron, and Logitech.
- Experience with structured cabling, rack building, and AV-over-IP systems.
- Strong problem-solving skills and attention to detail.
- Japanese and English fluency required

**Preferred Certifications**

- Crestron DigitalMedia or NVX Certification
  - QSC Q-Sys Level 1 or 2
  - Extron AV Associate or Control Specialist
  - Microsoft Teams Rooms Certified Specialist
-
