Job Description

As a senior backend engineer, you will:

- · Design and develop the Al Agent Framework
- · Build architectures for agent collaboration
- · Implement and operate scalable runtime environments
- · Work closely with researchers to translate cutting-edge advancements in LLMs and Al Agents into practical product features
- · Drive technical decision-making, improve development processes, and mentor other engineers to foster their growth.

Required Skills

· A bachelor's or master's degree in Computer Science or a related field, or equivalent practical experience

- \cdot 5+ years of hands-on experience in backend development using Python or Java
- \cdot A strong foundation in algorithms, data structures, and computer science fundamentals, with the ability to implement them in real-world scenarios
- · Experience with cloud platforms (AWS, GCP, or Azure) and container technologies (Docker, Kubernetes)
- · A deep interest in LLMs and AI Agents, with a passion for staying up-to-date with the latest advancements in the field

Company Description
