Job Description

As the Senior Technical Product Owner, of Global ERP Product Management, you will be responsible for driving business enablement for functions supported by ERP systems,

You will support key business processes and contribute to sophisticated intercompany international growth, ensuring the strategic scope and objectives of senior leadership are met.

Client Details

- Our client is a leading multinational medical company dedicated to developing innovative therapies and improving patient outcomes.
- They are committed to global expansion and providing effective solutions in the medical field.

Description

- Gather business requirements, ensuring viable technical solutions and delivering technology solutions based on the business plan
- Work with the Project Management Organization (PMO) to handle ongoing demand for product transformations

- Participate in and lead major ground-breaking product updates as part of the Global ERP Business Solution Partner organization
- Manage resources and priorities in product design, aligning technology delivery with company strategy
- Lead efforts and manage budgets within the product organization, ensuring strategic product decisions align with business objectives

Job Offer

- Competitive salary package and benefits
- Opportunity to work in a multinational medical company at the forefront of innovation
- Collaborative and inclusive work environment
- Professional development and growth opportunities
- Chance to contribute to the company's global expansion and make a positive impact on patient care
