Job Description

We are looking for experienced Rust developers to join one of the most exciting and global companies in Japan.

1) About the Company

This company develops a product that leverages technologies such as machine learning to structure and link critical design data—vital for various industries both inside and outside of Japan.

They are renowned for their international culture and offer some of the most competitive benefits in Japan.

Be part of an international work environment where your autonomy is respected.

2) Who You Are

- An experienced **Rust/Scala/Java/Go** developer.
- A team player who thrives in a collaborative work environment.
- Passionate about how the products you work on impact the lives of others.

3) Why You Should Apply

- **Flexible working options:** WFH, hybrid, and on-site modes of work are all supported.
- **Flextime system.**

Required Skills

Must Have

- 6+ years of development experience with **Rust, Scala, Java, or Go**.
- Experience with **AWS** for infrastructure.
- Professional-level **English and Japanese**.

Nice to Have

- Hands-on experience operating services using **Kubernetes**.
- Proficiency with container technologies such as **Docker**.
- Hands-on experience designing and developing **large-scale services**.
- Hands-on experience in **two or more programming languages**, including frontend languages (personal projects included).
