Job Description

With a balanced and highly technical approach, we will lead our customers to a successful "digital transformation" to accelerate their business innovation using next-generation technologies centered on the public cloud.

■Cloud Utilization Concept Planning
Based on a framework that adds Deloitte's perspective to best practices in cloud implementation, we will develop a concept to promote cloud utilization.

■Multi-Cloud Architecture Planning
In order to realize best practices when using multi-cloud, we will develop a cloud architecture that can utilize both offense

and defense.

■ Cloud Native Improvement Plan Development
In order to maximize the benefits of the cloud, we will develop an improvement plan for systems that utilize serverless and microservice architecture.

■ Cloud Migration Roadmap Development
We will develop an optimal migration method for each existing system and develop a plan to safely migrate the system to the public cloud.

■ Cloud Governance System Development
We will identify the risks of cloud utilization and develop improvement measures by utilizing a unique framework that adds Deloitte's knowledge to global standard specifications and rules.

■ Cloud Usage Guidelines Development
We will develop rules to safely promote cloud utilization in accordance with the regulations of your industry and business type.

■ Cloud operation advancement plan formulation
We will prepare tools for development and operation automation and quality improvement to promote DevOps, and also support the creation of the client's system.

■ Cloud cost reduction policy formulation
We will investigate the cloud environment from a cost perspective, propose measures necessary for cost reduction, and formulate a roadmap for responding to them.

Required Skills

- 5+ years of IT industry engineering experience. Experience in the development phase from requirements definition to operation and maintenance with end users and system integrators
- Basic IT infrastructure knowledge and design and construction ability, including middleware such as networks, storage, servers, databases, and application servers
- Development experience and qualifications using public clouds (AWS, Azure, or GCP)
- Logical thinking and strong verbal and written communication skills
- Highly collaborative, planning and execution skills that allow you to think and act independently toward your goals
- Motivation to learn the latest technologies

Company Description
