Job Description

Cloud Migration Project Manager (PM)

Job Description:

We are looking for a highly skilled Cloud Migration Project Manager to lead the modernization and migration of GIS-based applications from on-premises to the cloud. As a key member of our development department, you will be responsible for overseeing multiple projects, ensuring seamless migration, and maintaining high-quality deliverables.

Key Responsibilities:

1. Project Management & Execution Oversight
 - Select and manage multiple projects from approximately 50 systems and related initiatives within the development department.
 - Oversee project progress, schedules, and resource allocation while identifying and mitigating risks.
 - Lead the project across all phases, from proposal and contract to maintenance and operation.

2. Cost Management
 - Manage overall project budget and ensure operations align with financial plans.
 - Develop strategies to maximize cost efficiency and make necessary adjustments when required.
 - Report financial status to stakeholders, including customers and senior management, to ensure transparency.
 3. Deliverable Quality Management
 - Define quality standards for project deliverables and ensure they meet these standards through reviews and assessments.
 - Quickly implement corrective actions if quality issues arise and promote continuous improvement.
 - Conduct post-project quality evaluations and propose enhancements for future projects.
 4. Proposal & Contract Phase Support
 - Gather customer requirements and prepare proposals, cost estimates, and contract negotiations.
 - Collaborate with the sales team to support proposal activities and establish the necessary conditions for project initiation.
 5. Team & Vendor Management
 - Coordinate with internal teams and external vendors to ensure deliverable quality and timely completion.
 - Manage vendor relations and schedules to facilitate smooth project execution.
-

Required Skills

Ideal Candidate Profile:

- Strong leadership and initiative to drive projects to success.
- High analytical and problem-solving skills.
- Excellent communication and negotiation skills for effective stakeholder management.
- Proven ability to manage vendors and stakeholders effectively.
- Knowledge of Cloud, DevOps and Automation – Intermediate.

Required Qualifications:

- Practical experience as a Project Manager (PM).
- Experience in application modernization and cloud migration projects, including stakeholder coordination.
- Knowledge and experience in IT system development projects.
- Business-level English proficiency (spoken and written) for meetings, negotiations, and reporting.

Preferred Qualifications:

- Experience in deliverable quality management and review.
- Possession of PMP (Project Management Professional) or similar certification.
- Hands-on experience in implementing and utilizing project management tools.
- Knowledge or experience in GIS (Geographic Information Systems).

Work Location:

- **Higashi-Nihonbashi, Chuo-ku, Tokyo (Initially on-site)**

Working Hours:

- **9:00 AM – 5:30 PM(JST)**
-
