Job Description

Join a fast-growing tech startup whose mission is to address today's most significant operationally pressing issues through creating technologies that eliminate the need for manual labor and keeping up with the changing user expectations. We're seeking innovative engineers ready to build innovative solutions and grow with us!

In this position, you would be involved in:

- Firmware and Driver Development
- Real Time Systems
- Hardware Anomaly
- Integration and communication between the hardware and the software

Required Skills

Requirements:

- Strong experience in C++ on firmware development
- Knowledge of embedded communication protocols
- Ability to optimize hardware performance and resource usage
- Familiarity with ROS and Linux-based environments
- Experience with RTOS is a big plus!

Nice to have:

- Experience with Rust/Python
- Ability to read and interpret circuit diagrams
- Innovative mindset to find solutions
- Experience in coding challenges

Company Description
