Job Description

About Us

We are a leading SaaS company in the cybersecurity industry, specializing in innovative solutions to combat cyber threats, including ad fraud countermeasures within the ad-tech space. Our mission is to develop secure, scalable, and advanced systems that empower businesses to thrive in a safer digital environment.

We are seeking a highly skilled and experienced Product Manager (cybersecurity) to lead the strategy, development, and management of new cybersecurity solutions in the product line, with a focus on supply chain security: client-side security, application security, 3rd party JS scripts security. This pivotal role offers an opportunity to shape the future of cutting-edge cybersecurity products that protect our clients' digital assets and ensure the highest standards of data integrity, resilience and compliance.

As a Product Manager at our security product, you will play a pivotal role in driving the company's success. You will take ownership of your product domain and be responsible for its business performance.

Key Responsibilities:

Product Strategy & Roadmap:

Define and drive the product vision, strategy, and roadmap for cybersecurity solutions, aligning with company objectives and market demands.

Market Research & Trends:

Conduct market analysis to identify real life customer needs and problems, particularly in client-side security, application security, and supply chain security.

Stakeholder Collaboration:W

Work closely with engineering, sales, marketing, and customer success teams to ensure successful product development, roll-out, and adoption.

Revenue-Centric Approach:C

Collaborating with customers and prospects to align product features and roadmaps with key use cases and needs, while working closely with the engineering team to prioritize and deliver exceptional products.

Product Development:L

Lead the product development lifecycle from concept to release, ensuring timely delivery of high-quality features and functionality.M

Maintain a strong passion to WIN in a competitive market.

Required Skills

Qualifications

Current Residence:

Japan *Applications from outside Japan will not be accepted. Must be at work within 10 hours if necessary.

Experience:

At least 5+ years of experience in product management within the cybersecurity domain.

Domain Expertise:

Good understanding of client-side security, application security, supply chain security, JS tags security domains, threats, and competition.

Technical Knowledge:

Knowledge of vulnerability assessment, asset management and penetration testing tools (websites).

Strong knowledge of PCI DSS.

Experience in implementing threat modeling techniques and risk assessments. •

Hands-on experience with application performance monitoring (APM) tools and security event logging systems such as Splunk, ELK Stack, or SIEM platforms.

Communication Skills:

-Excellent written and verbal communication, with a proven ability to present complex topics to technical and non-technical stakeholders.

-Proficient in spoken and written English is mandatory. •

Problem-Solving: Strong analytical and problem-solving skills, with a data-driven approach to decision-making.

-Leadership: Demonstrated ability to lead cross-functional teams and influence without direct authority.

Preferred Qualifications

-Proficiency in cybersecurity frameworks, including OWASP, NIST, and CIS controls.

-Certifications such as CISSP, CISM, PMP, or OSCP.

-Experience with SaaS platforms and B2B product management.

-Knowledge of AI/ML applications in cybersecurity. •

-Experience with managing cybersecurity solutions in regulated industries (fintech, healthcare, etc) .
