Job Description

COMPANY OVERVIEW

A well-established client of us in Kuala Lumpur is seeking for Senior IT Quality Assurance.

JOB RESPONSIBILITIES

- Develop, document, and execute comprehensive test plans and test cases based on product requirements and specifications.
- Perform functional, regression, integration, performance, and user acceptance testing.
- Identify, document, and track defects using tools such as JIRA, or similar platforms.
- Collaborate with development teams to reproduce and resolve issues.
- Analyze test results and provide detailed reports on testing progress, quality metrics, and product readiness.

- Work closely with cross-functional teams, including product managers and designers, to understand project requirements and deliverables.
- Automate repetitive test cases using tools like Selenium, Cypress, or similar frameworks (optional but preferred).
- Stay updated on emerging QA trends, tools, and best practices to continuously improve the QA process.

JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- (SOLID 6 years experience) Proven experience as a QA Engineer or similar role in the IT/software development industry.
- Proficiency in testing methodologies, tools, and processes.
- Hands-on experience with test management tools (e.g., TestRail, Zephyr) and defect tracking systems.
- Familiarity with programming languages for test automation is a plus.
- Strong analytical, problem-solving, and communication skills.
- Attention to detail and ability to work in a fast-paced environment.
- Knowledge of Agile/Scrum development processes is preferred.
