Job Description

Our client is leading provider of IT services with a focus on network computing and e-business, catering primarily to major enterprise clients, business executives in the public and private sectors.

Location: Bangkok.

Responsibilities:

- Collect, evaluate, and record stakeholder and client business requirements.
- Convert business requirements into user stories and functional specifications for the development group.
- To guarantee alignment with corporate objectives, collaborate closely with developers, system architects, and project managers.
- Examine current company procedures and suggest ways to make them better or automate them.
- Take part in user acceptance testing (UAT), system configuration, testing, and solution creation.
- Serve as a point of contact for Thai development teams and Japanese clients.
- Encourage post-implementation tasks like problem-solving and training.

Qualifications:

- Bachelor's degree or higher in Business Administration, Computer Science, Information Technology, or related fields.
- At least two years of experience working as a business analyst or in a related position, ideally in banking or systems for financial services.
- Experience in system implementation or integration projects.
- A solid grasp of the BFSI industry's regulatory standards, business procedures, and financial products.
- Excellent analytical reasoning, problem-solving abilities, and meticulousness.
- Proficiency in English documentation and communication.
- The capacity to collaborate with Japanese clients and comprehend their demands and business culture.
