Job Description

COMPANY OVERVIEW
Our client is a leading provider of advanced solutions for testing and measuring semiconductor devices. They are known for their innovative technologies and have a significant presence in the semiconductor manufacturing industry.

They are in search of an experienced Data Engineer (individual contributor).

JOB RESPONSIBILITIES

- Develop and support ETL processes to integrate data from various sources into the data warehouse.

- Design, develop, and maintain data warehouse solutions using Oracle Cloud, Oracle Analytics Cloud, and ODI Marketplace.

- Develop and deploy analytical models using Oracle Analytics Cloud (OAC) to provide insights and drive decision-making.

- Collaborate with cross-functional teams to gather and analyze business requirements for analytical models and

reporting solutions.

- Design and optimize data models for business analytics and reporting.

- Perform data analysis and troubleshooting to identify and resolve issues.

- Maintain documentation of data warehouse architecture, processes, and procedures.

JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Information Systems, or a related field.

- 8 years of experience with Oracle Analytics Cloud, OBIEE/RPD modeling and ETL experience with ODI/Informatica.

- Experience with analytics visualization tools like OAC, Power BI, OBIEE, Tableau.

- Experience in end-to-end implementation involving data analysis, cleansing, and modeling.

- Experience handling Finance and SCM data and related pipelines.

- Knowledge of Oracle EBS COA, OU, MOAC, and multi-currency configurations.

- Knowledge of data warehousing concepts and methodologies (star schema, snowflake schema, dimensional modeling).

- Experience developing and deploying analytical models using OAC or similar tools.
