Job Description

JOB RESPONSIBILITIES

- To manage production and quality departments, ensuring targets are met with optimal quality and cost efficiency.

- To ensure full utilization of manufacturing resources and streamline operations as well as develop continuous improvement plans.

- To maintain equipment, enforce safety measures, and implement 5S practices.

- To manage raw materials, WIP, and finished goods to maintain production flow and storage efficiency.

- To collaborate with cross departments including engineering, maintenance, purchasing, and operations teams to resolve bottlenecks and maintain smooth workflows.

- To provide relevant training and development programs for subordinates as well as ensuring employee productivity.

- To monitor production planning & scheduling based on operational demands.

- To oversee quality system implementation as well as ensure products quality meets company standards and customers' requirements.

JOB REQUIREMENTS

- Bachelor's Degree / Master's Degree in Engineering, Manufacturing Technology or equivalent.

- Minimum 10 years of experience as **Operation & Production Management** in Manufacturing / Engineering sector, experience in **Automotive Parts Manufacturing** industry would be added advantage.

- Strong Leadership and People Management Skills in Manufacturing setting.
