Job Description

As a mobile engineer, you will be working alongside a diverse group from some of the top Japanese and international tech

companies to contribute to their iOS and Android applications.

With over 20 million app downloads since release - join a team of talented engineers in directly impacting the lives of millions of active users.

Who you are:
> Someone who wants to participate in growth and global expansion
> A team player who enjoys to work with others to achieve satisfying and clear results
> Someone who enjoys to learn new skills and acquire further knowledge
> Someone who loves to travel!

Why you should apply:
> Join an international work environment with open and like-minded people
> You will gain preferential use of airline tickets in Japan
> Join company trips to SE Asia, America, and more
> Fantastic opportunities to grow and progress your career

Required Skills

Requirements:
> 4+ years of combined experience with iOS and Android development
> Experience developing with Kotlin/Java & Swift/Objective-C
> Experience with Google Play Store and App Store releases
> Experience communicating in English and Japanese
> N3+ level Japanese *no certification needed

Preferred experience:
> Experience with Android SDK
> Experience with server-side development (PHP, JAVA, etc.)
> Knowledge of AWS/GCP, etc.

Company Description
