Job Description

We are seeking a talented and motivated Mid-Level PHP Developer to join the growing team. This is an exciting opportunity to work on cutting-edge projects

Client Details

Our Client is a major IT E-commerce company in Japan

Description

- Develop, test and maintain scalable and robust PHP-based web applications.
- Collaborate with cross-functional teams including product managers and project managers to define and implement new features.
- Write clean, well-documented and efficient code following team's internal standards as well as industry best practices.
- Debug and resolve application issues and bottlenecks to ensure optimal performance and user experience.
- Participate in code reviews to maintain end-to-end product quality and share knowledge with team members.

- Integrate third-party APIs and tools as needed to extend application functionality.
- Contribute to overall end-to-end product architecture and design (including databases such as MySQL, MariaDB or MongoDB).
- Assist in refactoring and modernizing projects as well as legacy code-bases.
- Stay up to date on emerging PHP, VueJS and Laravel trends and technologies and propose their adoption where applicable.
- Provide technical support and troubleshooting expertise for internal as well as external users.

Job Offer

- Competitive compensation
- Great work life balance
- Opportunity to great with a dynamic international team with cutting edge technologies
- Pension, insurance and commute fully covered
- Paid holiday provided after continously working for 6 months

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tianhong Han on +813 6832 8977.

Required Skills

- Minimum of 5 years of solid experience in PHP development or other programming language which can transfer to PHP.
- Minimum of 2 to 3 years of solid experience with VueJS, ReactJS or any other front-end framework.
- Strong knowledge of PHP web frameworks (such as Laravel, Symfony, or CodeIgniter).
- Proficient in HTML, CSS, Javascript or Typescript.
- Solid experience with relational databases (MySQL or MariaDB, or PostgreSQL).
- Understanding of version control systems, preferably Git.
- Familiarity with RESTful API development.
- Ability to write clean, efficient, and well-documented code.
- Strong problem-solving and analytical skills.
- Excellent teamwork and communication skills, with the ability to work independently.
