Job Description

This company is a globally expanding space tech company, who build and launch their own satellites. They have recently had a successful IPO, established subsidiaries in the US and Singapore previously, they are massively growing to keep up with their increasing business demand.

As part of this growth, they have just opened an additional satellite manufacturing site in Yamato, Kanagawa, to ramp up their satellite productions.

For this location, they're now actively hiring for an IT Engineer to take full ownership of the company's IT systems.

- Support and operate internal IT Systems
 - Respond to employee inquiries
 - PC kitting
 - Onboarding and offboarding of new employees and leaving employees
 - Manage devices and IT accounts
 - Create manuals, procedures and structures
-

Required Skills

- IT passport or similar qualification
 - Previous experience in company IT systems administration or management is a great advantage
 - Ability to commute to the office in Yamato 4-5 times per week
 - Ability to investigate technical issues and member issues and take appropriate action
 - Experience with operating network infrastructure like routers, VPNs, firewalls, etc. is a great advantage
-
