Job Description

Looking for a well-organized, technically skilled, and results-driven engineering leader to oversee several simultaneous software development initiatives. This position involves managing both client contract projects and internal product development, demanding solid knowledge of DevOps practices, backend development processes, and effective cross-functional collaboration.

Client Details

The US Headquartered Digital Consulting Company.

This company offers services in digital strategy, marketing, and software development, collaborating with clients in diverse industries.

Description

- Manage multiple client projects with clear plans, progress tracking, and risk control.
- Oversee the full software lifecycle for both client and internal projects.
- Lead backend and infrastructure design to ensure scalable, secure, and maintainable systems.

- Set up and maintain CI/CD pipelines, version control, and automated infrastructure.
- Work with AI/ML teams to smoothly integrate models following DevOps best practices.
- Coordinate external contractors and maintain quality across remote teams.
- Communicate clearly with clients about timelines, scope, and key updates.
- Continuously improve development speed, code quality, and team workflows.

Job Offer

- Flexible working style
- The opportunity to work in a global environment
- Use English and Japanese skills while collaborating with international teams
- The chances to travel to overseas offices

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayame Mabuchi at +81 3 6832 8613.

Required Skills

- 8+ years in software development, DevOps, or technical project delivery.
- Strong project management skills in fast-paced, multi-client environments.
- Hands-on experience with Azure (preferred), cloud-native, and on-prem deployments.
- Proficient in backend development, Docker, Kubernetes, and infrastructure-as-code.
- Experience managing external teams and hybrid delivery models.
- Comfortable using Jira, Azure DevOps, and Notion.
- Fluent English & Business Japanese
