Job Description

Position: IT Manager

Total package: 80,000 - 83,000 THB

Location: Amata city Chonburi

Responsibilities:

- Manage, mentor, and lead IT team members, fostering a collaborative and high-performing environment.
- Actively participate in global projects initiated by JP HQ, Production Systems, Accounting Systems, ERP implementation, and Infrastructure Systems.
- Oversee all aspects of internal IT operations within the manufacturing environment.
- Network Infrastructure: Build, review, and maintain the company's IT network infrastructure to ensure optimal performance and reliability.
- Implement and maintain robust IT security measures to protect company data and systems from internal and external

threats.
- Manage company computers, software applications, and ensure their efficient operation and maintenance.
- Maintain network infrastructure, software applications, devices, ERP system, data center, and other critical IT assets.
- Provide efficient and effective IT troubleshooting and support to end-users across the organization.
- Update existing IT systems and implement new systems and technologies based on business requirements and requests.
- Collaborate with JP HQ to design, implement, and enforce IT policies and procedures in alignment with global standards.

Qualifications:

- Minimum of 5 years of hands-on IT experience within a manufacturing company.
- Minimum of 3 years of management experience leading an IT department or team.
- Daily conversational level proficiency in English is essential for effective communication.
- Strong knowledge and practical experience with network infrastructure, security protocols, and relevant software systems.
- Familiarity with SAP, particularly in a production environment.
- Experience with accounting software systems.
- Knowledge of IT Infrastructure concepts and tools, including: IPSCAN (DHCP management, intrusion detection), FortiGate (VPN configuration and management)
- IT Asset Management principles and practices.
- Knowledge of Wi-Fi Access Point management, preferably with Cisco equipment.
- Proven experience in participating in global IT projects, including effective liaison and communication with Headquarters (HQ).
