Job Description

We are looking for a talented individual to join our client team as a Senior Data Engineer.

Responsibilities:

- Develop and manage code and processes for data exchange between on-premise and cloud solutions.

- Collaborate with IT and business stakeholders to understand requirements and data usage.

- Design and implement a data integration architecture to meet objectives.
  Establish principles, standards, and best practices for data management.

- Create and improve API and ETL strategies to enhance business capabilities.

Qualifications:

- Bachelor's degree in IT, MIS, AIS, Computer Science, Engineering, or related fields.

- 3+ years of experience in enterprise-level data integrations.

- Strong skills in writing SQL queries, stored procedures, and triggers.

- Extensive experience with database platforms.

- Proficiency in both Thai and English.
