### Job Description

**Company Overview**

Our client a well-established leader and A1 main contractor in the civil engineering and construction industry, known for delivering high-quality projects across infrastructure, building, and specialized engineering sectors. As they continue to drive growth and expansion, they are now seeking a Senior Project Engineer to join their team and contribute to their ongoing success.

**Key Responsibilities**

- Lead and manage projects from planning through to completion, ensuring all objectives are met on time and within budget.
- Coordinate and liaise with clients, subcontractors, and internal teams to ensure seamless communication and effective project execution.
- Develop detailed project schedules, monitor progress, and implement corrective actions when necessary.
- Oversee quality control, health, and safety standards on-site to ensure compliance with industry regulations.
- Provide technical guidance and mentorship to junior engineers and project staff.
- Prepare and present reports on project progress, costs, and scheduling to stakeholders.

- Proactively identify potential risks and develop mitigation strategies.

#### Key Requirements

- Bachelor's degree in Civil Engineering or related field.
- At least 5 years of experience in project management within the construction or civil engineering industry.
- Proven track record in managing complex projects with successful outcomes.
- Strong knowledge of construction processes, materials, and legal regulations.
- Excellent leadership, communication, and negotiation skills.
- Professional Engineer (PE) license is preferred.
- Excellent communication, leadership, and problem-solving skills.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
