Job Description

This role will be responsible for transforming regional (APAC) demand streams into an actionable supply plan.

Job Responsibilities

- Evaluate vendor-created requirements and design specifications to ensure they are fit for purpose.
- Collaborate with Business SMEs to gather and derive business and system requirements, translating them into functional and technical specifications.
- Apply cross-functional business processes to identify fit gaps and propose remediation strategies.
- Develop specific strategies and solutions to meet project deliverables.
- Oversee and resolve system issues within the applications portfolio to determine the best course of action.

- Document business processes and identify opportunities for improvement.
- Review planning requirements and understand the factors driving net changes.

Job Requirements

- Bachelor's degree in an appropriate discipline required.
- With more than 12 years of working experience in supply chain field; preferably in contract manufacturing or EMS industry
- Wide, solid breadth in Materials management experience including Purchasing, Planning (Strategic & Tactical) and Manufacturing
