### Job Description

Our client, well established Data Centre Based Company, is looking for well experience Safety Manager

### JOB RESPONSIBILITIES

- Liaise with Group EHS Department to support and assist in ensuring EHS standards and requirements, relevant statutory obligations and regulatory requirements, codes, and laws, are implemented, efficiently managed, and maintained throughout the project duration.
- Work in conjunction with the Project Team, Contractor site management team and EHS Manager in implementing the Project Safety Management System

## **JOB REQUIREMENTS**

- Any other recognised qualifications in Construction Management, Engineering, or related field will be an added advantage.
- Minimum 10 years of working experience in managing EHS in design and construction, preferably in the data centre environment. Experience in EHS management in an asset-related field as part of portfolio will be an added advantage.
- Experienced in the development and roll-out of EHS management systems, processes, and programmes, with knowledge of safety system analysis and proficiency in conducting data analysis and reporting leading and lagging statistical indicators
