Job Description

Company and Job Overview
Our client is a multinational design and build construction company, based in Petaling Jaya, is seeking for a design engineer professional. The chosen candidate will be responsible in designing data centres before the tender and proposal work stage.

Job Responsibilities

- Conduct design and tender activities.

- Prepare and submit plans to relevant authorities.

- Coordinate with main contractors, builders, consultants, and other M&E service providers.

- Participate in project execution tasks during the design and commissioning phases.

Job Requirements

- Bachelor's degree in Electrical or Mechanical Engineering or a related field.

- Minimum of 2-3 years of experience in design engineering within the construction industry.

- Extensive technical expertise in mechanical and electrical tasks.

- Familiarity with local authority application processes.

- Experience in data centers is a plus.

- Proficiency in BIM/CAD software.

- To be considered for this role, the relevant rights to work in Malaysia are required. Candidates who require work pass need not apply
