Job Description

Company and Job Overview

A leading technology-driven value-added distributor of electronic components across Hong Kong, China, ASEAN countries, and the India region is hiring a Field Application Engineer in Penang.

Key Responsibilities

- Lead "design-in" initiatives and product promotion activities to enhance market penetration.
- Spearhead efforts to develop and establish relationships with new demand-creation customers.
- Align and collaborate with suppliers to plan and execute technical promotion activities effectively.
- Utilize exceptional troubleshooting skills to deliver in-depth technical support and solutions to customers.
- Organize and conduct seminars and training sessions to educate and empower customers.

Key Requirements

- A degree in Electronics & Electrical Engineering or a related field.
- Strong knowledge and hands-on experience with MCU, Analog & Power Management design, and FPGA Design.
- A minimum of 1-2 years of relevant work experience in the electronics industry.
- Excellent presentation and communication skills.
- Ability to work independently while also being an effective team player.
- Willingness to travel overseas as required.
