### Job Description

Our client is a reputable multinational energy solution provider with a strong regional presence and focus on power plant services. As part of their business expansion into new energy segments, they are seeking a dynamic and technically proficient **Business Development Engineer** with solid background in **Thermal Power Plant systems** to join their growing team.

- **Location to work:** The Garden, Mid Valley Kuala Lumpur
- **Industry:** Power Plant

### Job Responsibilities: -

- Analyze and respond to technical enquiries and specifications from vendors and customers
- Identify and develop new business opportunities in the OEM and CN products space

- Work closely with internal technical teams and group companies to evaluate project feasibility
- Prepare technical proposals and provide engineering support to the Business Development Unit
- Assess business and engineering risks and propose mitigation strategies
- Coordinate with global offices and partners to support regional business expansion
- Attend meetings, support site activities and travel domestically and internationally as required

Requirements:

- Degree in Engineering (Mechanical/ Electrical or related field)
- Minimum 5 years of working experience in an engineering or technical role, preferably in Power Plant Systems, or OEM/ OEM services
- Strong understanding of Thermal Power generation systems and equipment
- Ability to read technical drawings and conduct spare part checks
- Self-motivated, proactive and capable of working independently
- Strong communication and teamwork skills
- Willing to travel for business meetings or site support (locally and overseas)
