Job Description

About the company

We are looking for an experienced product manager to work for an exciting, rapidly growing Japanese company.

They offer a fully remote work environment, with a diverse team from more than ten countries, creating a strong international atmosphere.

Who are you?
• You are an experienced product manager (senior data scientists, MLOps engineers, and candidates from a strong, computer science background specialising in AI also considered).
• You are a self-motivated individual who enjoys leading a team of engineers.
• You enjoy driving the integration of cutting-edge R&D into the product.

Why you should apply

Fully remote working with flexible hours.

A diverse, international team environment.

Experience working with an exciting and rapidly expanding company in Japan.

Required Skills

Requirements
1. 5+ years of experience in AI project management or AI product management.
2. Practical experience as a software engineer or knowledge of programming.
3. Willingness to engage with clients (English speaking).

Desired
•   Research and development experience in artificial intelligence (AI), machine learning (ML), or deep learning (DL).
•   Experience communicating with clients in Japan's manufacturing, automotive, or healthcare industries.
•   PhD in computer science (CS), artificial intelligence (AI), or machine learning (ML).
