## Job Description

One of the biggest international company that is famous for advanced technology in aerospace and defense industries, is looking for bilingual (English&Japanese) candidate with decent experiences in server, virtulization, product deployment and database!

**Client Details**

A global leader in aviation and defense, providing cutting-edge technology solutions

**Description**

- System Deployment & Integration: Install, configure, and test airline and airport applications, integrate third-party software, and set up common-use workstations.
- Customer Engagement & Support: Work closely with airlines, airport authorities, and local technical teams to ensure smooth implementation and operation.
- Technical Analysis & Optimization: Conduct system performance evaluations, troubleshoot issues, and suggest improvements.
- Cross-functional Collaboration: Coordinate with project managers, sales, and support teams to ensure seamless technical operations.

- On-site & Remote Support: Provide third-level support, work with maintenance teams, and help resolve engineering issues while ensuring SLAs are met.

**Job Offer**

- The opportunity to work in a multicultural and inclusive environment.
- Comprehensive training and development opportunities.
- Use English and Japanese skills while collaborating with global teams.
- The chances to travel to other countries in APAC
