Job Description

Big global IT company is looking for solution architect. You'll design and implement infrastructure solutions using Ansible, OpenStack, and cloud-native technologies. Both of Japanese and English speaker are preferable!

Client Details

This client is a global powerhouse in IT services and consulting, with a growing and innovative presence in Japan. With a focus on digital transformation, cloud innovation, AI, and automation. The clients fosters a dynamic environment where innovation thrives, offering clients trans-formative solutions that not only meet today's demands but also anticipate tomorrow's challenges.

Description

- Design scalable, automated infrastructure solutions using Ansible and OpenStack.
- Create architectural diagrams and technical documentation.
- Develop and maintain Ansible Playbooks for automating infrastructure tasks.
- Integrate NFV, SDN, and cloud-native technologies into client infrastructure.
- Evaluate and implement storage, networking, and compute solutions for telecom.
- Collaborate with stakeholders to ensure project success in Japanese and English.

Job Offer

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayaka Iwaki at +81 3 6832 8658.

Required Skills

- Automation: playbook development, and configuration management.
- OpenStack: Cloud infrastructure design, deployment, and management.
- Linux: System administration, troubleshooting, and scripting.
- Networking: Routing, switching, and SDN technologies.
- Business level of Japanese and English.
- Cloud Technologies/IT Infra Skills: Experience with AWS, Azure, OCI, Docker, Kubernetes (k8s), etc.
- Project Leadership: Experience leading and managing projects.
