Job Description

Our client, a global leader in e-commerce and digital services, is looking for dedicated lead DevOps engineer to manage infrastructure and DevOps of the department. English only position!

Client Details

Our client is global technology company, known for its e-commerce platform, online banking, digital content, and telecommunications services. They operate in multiple countries, so understanding cultural differences and multilingual support might be beneficial.

Description

- Manage and guide multiple DevOps teams in the development, deployment, and maintenance of software applications and systems.
- Drive the design and implementation of automation tools for software deployment, testing, and system monitoring.
- Lead the architecture and design of scalable, secure, and high-performing software applications and infrastructure.
- Coordinate the resolution of complex technical issues that span multiple teams or organizations.

Job Offer

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Competitive salary and benefits package
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayaka Iwaki at +81 3 6832 8658.

Required Skills

- Strong knowledge of DevOps principles, including continuous integration and delivery (CI/CD).
 - Proficient in scripting languages such as Python or Bash.
 - Experienced with containerization tools like Docker and Kubernetes.
 - Skilled in cloud platforms such as AWS, Azure, or Google Cloud.
 - Excellent problem-solving and analytical skills.
