**Job Description**

We are currently a global company with more than 500 foreign engineers from about 60 countries actively working.

You will be working on projects by clients.

Development and implementation of customer solutions for various industries such as IT, manufacturers, finance, services, etc. You will analyze the data, implement algorithms, create predictive models using machine learning (decision tree, logistic regression, random forest, naive bayes classifier, k-NN, k-means or neural network), build a hypothesis using statistical analysis and clustering.

We will assign a project which matches your expertise of programming language or experiences.

**[Project examples]**

- Create a predictive model of sales trends in machine learning by weather change
  - Data analysis using the access log data
  - Implement the assignment optimization system for HR team
- 

**Required Skills****[Qualifications]**

- Hands on experience of data science
- Experience using Python or R
- Bachelor's or higher degree in Computer Science, Information Technology, Statistics or Mathematics

\*Please be sure to attach a resume in Japanese or English when applying.

**[Support/Employee Benefits]**

We provide various training and support related to daily life and the Japanese language so that everyone can thrive in Japan with peace of mind.

- Air ticket support
- Visa support
- Housing arrangements & partial housing allowance support
- Japanese language training & Business manner training
- Regular Follow-up meeting
- Others(Health insurance, Commuting allowance, Annual medical check-up, Paid holiday etc.)

For any questions or other support, please feel free to consult with the interviewer directly during the interview.
