Job Description

Work as a DevOps/SRE Engineer supporting a global payment infrastructure on AWS. You'll handle automation, operations, and system scalability in a high-demand, cloud-native environment.

Client Details

This leading global tech company operates dozens of services across e-commerce, fintech, and communications, creating one of the largest digital ecosystems in the world. The team you'll join supports key payment infrastructure services that power transactions for both internal and external platforms, with a strong culture of innovation, collaboration, and engineering excellence.

Description

- Design, automate, and maintain secure and scalable AWS infrastructure
- Manage infrastructure using infrastructure-as-code tools
- Ensure system reliability, scalability, and availability in production
- Troubleshoot and resolve incidents in a multi-service architecture
- Collaborate with global stakeholders across Dev, Ops, and Product teams
- Participate in on-call support and performance tuning

- Support monitoring and alerting for mission-critical systems

Job Offer

- Exposure to cutting-edge tools and platforms (Kubernetes, Istio, Prometheus, Datadog).
- Gain enterprise-level experience with AWS infrastructure
- A collaborative, multicultural team environment.
- Opportunities for long-term employment.
- Weekends and holidays off, Hybrid work, with a 9:00-17:30 work schedule.
- Free meals for breakfast, lunch, and dinner.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

Required Skills

- 3+ years in DevOps/SRE/Infra Engineering and/or Database Engineering
- Business-level English communication skills
- Hands-on experience with AWS or another major public cloud
- Comfortable with scripting (Python, Bash, or Go preferred)
- Familiar with Git and CI/CD tools
- Skilled in stakeholder communication and issue analysis
- Flexible and proactive mindset for learning and problem-solving
- Experience with tools such as Ansible, Chef, or CloudFormation is a plus
- Background in e-commerce or payment systems is advantageous
