### Job Description

**About the company**

Join a rapidly growing startup in Japan's thriving AI ecosystem, focused on building innovative, real-world applications of Generative AI. Backed by experienced founders and strong financial support, the company is developing next-generation SaaS products aimed at transforming industries such as marketing, enterprise productivity, and automation.

**Why you should apply**

- Join a fast-growing startup that's building cutting-edge SaaS products powered by Generative AI
- Enjoy a flexible, hybrid working style that supports work-life balance
- Take advantage of Japanese language learning support and a range of other benefits to help you thrive professionally and personally

### Required Skills

**Who are you**

We're looking for an experienced Full Stack Engineer who can lead AI product development—building solutions that consumers will continue to choose, while solving a wide range of technical challenges along the way.

**Requirements**

- 4+ years of professional experience in software development
- Proficient in at least one back-end programming language, preferably Python
- Hands-on experience with cloud platforms, such as GCP
- Experience developing web applications using modern frameworks

**Desired skills**

- Strong interest in Generative AI and emerging AI technologies
- Experience building SaaS-based web applications
