Job Description

Work on a global cloud infrastructure team managing mission-critical payment systems.

Collaborate in a DevOps/SRE role using AWS technologies and automation tools.

Client Details

This company is one of the largest, global technology organizations known for delivering secure, scalable, and high-performance services across fintech, e-commerce, and cloud platforms.

With an international team and a culture of innovation, the company offers an exceptional opportunity to grow your career in cloud engineering while working on impactful, high-traffic systems.

Description

- Develop, manage, and automate AWS-based infrastructure.

- Use infrastructure as code to manage DNS, networking, containers, and databases.

- Collaborate across teams to ensure system reliability and scalability.

- Monitor, troubleshoot, and optimize cloud system performance.

- Support business continuity through stable system operations.

Job Offer

- Competitive compensation and benefits.

- Flexible, hybrid work structure.

- Cutting-edge tech environment with AWS, Docker, Jenkins, etc.

- Collaborative international workplace.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Taishi Oyamada on +813 6832 8665.

Required Skills

- 3+ years in SRE, DevOps, or infrastructure engineering.

- 3+ years of experience in database management or similar roles.

- Strong understanding of AWS or other public cloud platforms.

- Skilled in Git, scripting (Python, Bash, or Go), and CI/CD pipelines.

- Business-level English; Japanese NOT required.
