Job Description

We're looking for a QA Analyst to join our team. This is a full-time role in an international environment. You will help make sure our systems work well and meet high standards. You'll be involved in testing new features, finding bugs, and working with teams across different countries.

Responsibilities:

- Create test plans and run tests for new systems and updates
- Find and report bugs using tools like JIRA or TFS
- Work with developers, testers, and business users to fix issues
- Help with User Acceptance Testing (UAT) and support business users
- Keep track of testing progress and bug fixes
- Set up and manage test data (including data masking)
- Look into issues by checking logs and settings
- Help improve or build automated test tools

Requirements:

- Bachelor's degree in IT or a related field
- 2+ years of experience in QA or software testing
- Able to find and explain bugs clearly
- Comfortable talking to developers and business teams
- Good problem-solving skills and attention to detail
- Able to work on several tasks at once and adapt quickly
- Good English skills (writing and speaking)

Interested candidate, please submit your most recent resume in English (Word format) by simply clicking "APPLY NOW'
