Job Description

About the company

A global leader in the financial services industry, the company is driving innovation through data, AI, and responsible technology. With a strong commitment to ethical AI, digital transformation, and customer-centric solutions, it fosters a collaborative and inclusive culture. Employees benefit from continuous learning, flexible work arrangements, and opportunities to make real-world impact in a purpose-driven, forward-thinking environment.

Responsibilities

- Design, implement, and maintain scalable ML/AI pipelines and infrastructure using MLOps, LLMOps, and GenOps best practices.
- Collaborate with domain data scientists, Data Platform Engineering, and AI Governance to operationalize models under internal governance standards.
- Ensure successful delivery of business-driven solutions by:
 - Aligning technical solutions with business requirements and timelines

- Coordinating with technical teams on dependencies
- Providing accurate estimates and progress updates
- Identifying and communicating risks early
- Maintaining high-quality standards throughout delivery

Why you should apply

- Work with cutting-edge ML/AI technologies and industry-leading MLOps, LLMOps, and GenOps practices
 - Collaborate closely with diverse data scientists, engineers, and AI governance teams
 - Lead technical design and contribute to impactful business-driven AI projects
 - Inclusive, diverse workplace valuing creativity, innovation, and collaboration
 - Flexible work arrangements promoting work-life balance and wellbeing
-

Required Skills**Required:**

- 5+ years of experience in software development with practical exposure to ML/AI systems
- Proficient skills in Python
- Practical experience with MLOps/LLMOps tools and practices (e.g., MLflow, Kubeflow)
- Experience with cloud platforms (AWS preferred) and container technologies (e.g., Docker, Kubernetes)
- Knowledge of CI/CD/CT (continuous training) pipelines and DevOps/ModelOps/DataOps principles and tools (e.g., JIRA, Jenkins)
- Understanding of modern data stack and data processing frameworks using Cloud SQL warehouses

Preferred:

- Experience with Databricks or similar platforms
 - Experience with model monitoring, drift detection, and observability tools
 - Knowledge of AI ethics principles and fairness metrics
 - Familiarity with relevant regulations (e.g., GDPR, CCPA, EU AI Act)
 - Domain experience in the financial or insurance industry
-
