Job Description

About the company

A leading provider of AI-powered software is trusted by professionals at over 7,000 companies worldwide. Since 2017, this fast-growing tech company has raised ¥17.9 billion, expanded globally, and built tools to streamline workflows. With new innovations coming in 2025, it continues to reshape how technology supports modern work.

Who are you

- You design and implement GenAI text models and turn prototypes into scalable NLP solutions.
- You develop generative NLP algorithms to analyze complex text and extract meaningful insights.
- You collaborate closely with cross-functional teams and stay up to date with the latest in AI and machine learning.

Why you should apply

- The company gives great opportunities for talented engineers to build their careers.
- They have a collaborative focus.
- They cultivate an environment that fosters innovation and creative problem-solving.

Required Skills

Requirements

- **NLP Task Proficiency:** Experience with text representation, semantic extraction, and advanced NLP techniques.
- **Programming Skills:** Proficiency in programming languages such as Python and Go.
- **Machine Learning Knowledge:** Experience with machine learning ML production frameworks (e.g., Keras, PyTorch).
- **Problem-Solving Abilities:** Strong analytical and problem-solving skills.
- **Communication Skills:** Good English communication and teamwork abilities.
- No Japanese is required.
