Job Description

COMPANY OVERVIEW

My client is well-known Japanese IT company, providing digital transformation solutions to clients from various industries. They are looking for a Senior Business Analyst to join their bank project.

JOB RESPONSIBILITIES

- Gather and organize business requirements from stakeholders with appropriate domain understanding
- Act as the liaison between branch users and the bank's internal IT team, working primarily on-site at the bank premises
- Analyse business requirements and translate them into complete use cases, workflows, and logic definitions

- Create/Review of Basic Design, Detailed Design and Test Plans, Scenarios and Cases
- Create solutions across diversified domains and technologies
- Create migration and deployment plan of new system to multiple branches
- Provide quality assurance to the development team, especially from a functional and technical perspective

JOB REQUIREMENTS

- More than 10 years of Business analyst for Bank Domain system
- Proven experience creating high-quality business requirement documents (e.g. BRD, FRD, Traceability matrix, etc) with End user.
- Hands-on experience in rolling out applications across multiple branches using centralized systems
- Involved in system development projects from scratch, including requirement definition and design
- Experience leading a small to mid-sized team as a team leader or module leader
- Prior involvement in mission-critical systems implementation for large enterprises
- Experience working with Japanese-oriented companies (JOC) or Japanese banks (preferred)
- Familiarity with systems using Enterprise Service Bus (ESB) architecture (preferred)
- Knowledge or experience in deposit-related business processes and systems in the banking domain (preferred)

Apply online for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
