Job Description

About the company

Join a well-established multinational company with a diverse and inclusive environment, dedicated to providing innovative solutions for managing office supplies and improving workplace efficiency. One of their main products helps track and control office inventory, with the overall goal of helping businesses reduce costs, maintain smooth workflows, and stay organized.

Responsibilities

You'll be part of a team that collaborates across departments to build solutions for efficiently processing large volumes of tasks. You will be developing and maintaining a reliable platform that can handle multiple tasks at once and scale as needed. Some examples of these tasks include converting design files, pulling out key data points, and analyzing features using machine learning.

Required Skills

Required

- 7+ years of hands-on experience designing and building backend systems for web applications.
- Strong proficiency in languages such as Rust, Java, Go, or C++.
- Solid experience developing and operating solutions on public cloud platforms, particularly AWS

Preferred

- Experience designing and developing large-scale, high-performance services
- Proficiency in Rust, the primary language used in recent projects.
- Japanese communication skills are a plus, with the ability to work effectively in cross-cultural teams.
