#### Job Description

The role of a Developer in the Technology & Telecoms industry involves designing, testing, and maintaining software solutions tailored to meet client needs. Located in Tokyo, this position offers an opportunity to contribute to innovative projects in a fast-paced environment.

#### Client Details

This small-sized company operates within the Technology & Telecoms industry, providing cutting-edge solutions and services to its clients. They are known for their focus on delivering quality and staying at the forefront of technological advancements.

#### Description

- Develop, test, and maintain software applications to meet project requirements.
- Collaborate with cross-functional teams to gather and analyze system requirements.
- Ensure code quality through regular reviews and debugging processes.
- Optimize application performance and troubleshoot any technical issues.
- Create technical documentation for reference and reporting purposes.
- Stay updated with emerging technologies to suggest innovative solutions.

- Provide support and updates for existing software systems as needed.

### Job Offer

- Competitive monthly salary ranging from JPY 1296000 to JPY 1584000.
- Temporary position with the potential for extensions based on performance.
- Opportunities to work on innovative projects in the Technology & Telecoms industry.
- Exposure to a collaborative and forward-thinking work environment in Tokyo.
- Standard employee benefits included.

If you are excited about this Developer role and eager to contribute to a company in Tokyo committed to technological innovation, we encourage you to apply today!
