Job Description

Join a fast-paced tech team building large-scale, user-facing features for a major e-commerce platform. Work closely with designers and engineers to deliver high-quality, scalable front-end systems using modern technologies in a global, English-speaking environment.

Client Details

The client is a leading global tech company operating one of the largest e-commerce platforms in Japan. Their development teams focus on building high-impact, scalable services that support both shoppers and merchants, with a strong emphasis on innovation, performance, and user experience.

Description

- Develop and launch high-quality, user-facing features for large-scale web systems

- Write clean, reusable, and high-performance front-end code

- Continuously improve system architecture and JavaScript performance

- Contribute innovative ideas to enhance product functionality and user experience

- Collaborate closely with designers, engineers, and stakeholders in a global team

Job Offer

- Flat open minded working environment
- Free meals
- Working hours 9:00 to 17:30

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Riko Ichio +81366276091.

Required Skills

- Experienced in building modern web apps with **React, Redux, TypeScript, and Jest**

- Strong understanding of **JavaScript internals (ES6+), HTML5, CSS3**, and async web behavior (AJAX, partial updates)

- Skilled in **Node.js** and familiar with API development, CI/CD, and containerization (e.g. Jenkins, Docker)

- Comfortable solving **cross-browser compatibility** issues and working with various JavaScript frameworks

- A proactive problem-solver who thrives in **diverse, multicultural teams** and contributes to scalable UI systems

Company Description

The client is a leading global tech company operating one of the largest e-commerce platforms in Japan. Their development teams focus on building high-impact, scalable services that support both shoppers and merchants, with a strong emphasis on innovation, performance, and user experience.
