Job Description

You will be part of a team leading the design, development, and implementation of robust and scalable cloud security solutions. This is a great opportunity to work with cutting-edge technology, contribute to security strategy, and make a real impact on protecting critical cloud infrastructure.

Client Details

A leading global financial services group, seamlessly connecting markets and expertise worldwide to deliver innovative, integrated solutions - with excellent training and upskilling opportunities to support your continued growth and career development.

Description

- Develop and enforce cloud security policies aligned with regulations and best practices.
- Deploy and manage controls to protect cloud infrastructure from threats like unauthorized access and data loss.
- Evaluate and implement cloud security tools (e.g., CSPM, CNAPP) to strengthen security in line with business goals

and risk frameworks.

Job Offer

Join an engineering-driven culture and work with cutting-edge security technologies to protect mission-critical financial systems.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tomoji Miyashita on +813 6832 8652.

Required Skills

- 8+ years of experience in information security, with a focus on cloud security

- Proven track record in designing and implementing enterprise cloud security solutions

- Strong knowledge of cloud platforms (AWS, Azure, GCP), security frameworks (NIST, OWASP)

Company Description

A leading global financial services group, seamlessly connecting markets and expertise worldwide to deliver innovative, integrated solutions - with excellent training and upskilling opportunities to support your continued growth and career development.
