#### Job Description

As a Security Operation Engineer, you are responsible for monitoring, managing, and responding to information security within the IT environment of an organization.

**Client Details**

We aim to build a secure and resilient infrastructure to support the evolving needs of finance. Our focus is on enabling safe, reliable systems for the future of the industry.

**Description**

- Continuously monitoring security events and alerts using SIEM and other tools
- Performing initial incident response to contain and mitigate threats

- Conducting root cause analysis and coordinating with relevant teams to implement preventive measures
- Tuning and maintaining security monitoring tools (e.g., IDS/IPS, EDR) to improve detection accuracy

### Job Offer

Join an engineering-first culture where you'll work with advanced security technologies. Your role will directly impact the safety of mission-critical financial systems.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tomoji Miyashita on +813 6832 8652.

---

### Required Skills

- Proficient in monitoring and incident response (SIEM, EDR/IDS, log analysis) for swift threat detection and mitigation.
  - Strong analytical skills for root cause analysis, threat hunting, and implementing preventive measures.
  - Clear communicator and collaborator, creating precise incident reports and playbooks while coordinating remediation with teams.
  - Solid grasp of security frameworks (ISO 27001, NIST, ITIL) and experience in cloud and on-prem environments to align with risk requirements.
- 

### Company Description

We aim to build a secure and resilient infrastructure to support the evolving needs of finance. Our focus is on enabling safe, reliable systems for the future of the industry.
