Job Description

【About the Company】

The company is a Japanese cybersecurity firm. Its main service, Spider AF, an ad fraud prevention tool, has received certification from the Trustworthy Accountability Group (TAG)'s anti-fraud program, a globally recognized authority that enhances trust in the digital advertising industry. This enables the company to provide highly reliable, world-class ad fraud prevention.

Under the vision of "Building a Safer and Happier future with Automation," the company strives to deliver various "Wow!" experiences to its users.

With development bases in Tokyo and Portugal, the company boasts a multinational workforce.

[About the Job...]

About the Role

The company is seeking a Product Manager to join the growing team and contribute to the development of innovative solutions in the Ad Tech, Ad Fraud, and MarTech domains. This role presents an exciting opportunity to be part of a fast-evolving industry, working on products that help organizations safeguard their digital advertising investments and improve marketing performance.

As a Product Manager, you will play an important role in shaping the product roadmap, collaborating with cross-functional teams, and delivering value to our customers. You will be responsible for managing the product development lifecycle, from initial research and requirement gathering to feature delivery and iteration.

Key Responsibilities

- **Support Product Strategy:** Contribute to the development and execution of the product vision and roadmap through ongoing research of customer needs, market trends, and competitor offerings.
- **Cross-Functional Collaboration:** Work closely with engineering, sales, marketing, and customer success teams to ensure the effective planning and delivery of product initiatives.
- **Customer Engagement:** Conduct interviews and gather feedback from customers and stakeholders to inform product decisions and validate new ideas.
- **Support Customer Success:** Collaborate with the Customer Success team to understand client feedback, address product-related requests, and proactively identify opportunities to improve the user experience.
- **Requirements Definition:** Create clear and concise product specifications and user stories, ensuring development priorities are aligned with business goals.
- **Go-to-Market Coordination:** Assist in planning product launches and supporting go-to-market activities, including internal enablement, documentation, and customer communications.
- **Data-Driven Decision-Making:** Monitor product performance using relevant metrics and analytics, and recommend improvements based on data insights.

About the Company

The company is an innovative ad fraud detection and cybersecurity company dedicated to safeguarding the digital advertising and marketing ecosystems. By empowering companies to detect, block, and protect against fraudulent activities, the company plays a critical role in defending online business from evolving threats. With its advanced cybersecurity solutions and unwavering commitment to transparency, the company enables clients to enhance the security and impact of their digital campaigns, ensuring maximum effectiveness.

Why Join the Company?

At the company people come first. They are committed to offering our employees the best environment and resources for personal and professional growth. The company is defined by a foundation of accuracy, integrity, and trust, which guide the way they shape the organization, build the products, and communicate with both each other and the clients. They enjoy organizing company regular offsites (Tokyo and Lisbon headquarters) where the team can collaborate in person, foster connections, and work together in an inspiring environment. The company culture and team spirit create an environment that inspires initiative, embraces new ideas, and makes the journey enjoyable!
