## Job Description

We are looking for a highly experienced and independent C# Developer who can handle the full software development lifecycle. You will be expected to design, build, test, and deploy robust applications with minimal supervision in an enterprise setting.

**Client Details**

Our client is a well-established enterprise operating a complex digital platform used across multiple departments. The technology team is expanding to support several internal initiatives and is seeking a reliable expert to lead key development efforts.

**Description**

- Participate in and lead the full software development lifecycle: design, development, testing, deployment, and maintenance
- Architect and implement scalable backend systems using C# and .NET Core

- Work closely with stakeholders to gather technical and business requirements
- Write clean, maintainable, and well-documented code
- Conduct code reviews and mentor junior developers if applicable

### Job Offer

- Long-term renewable haken contract
- Opportunity for high autonomy and leadership in technical execution
- Competitive monthly salary based on experience
- Modern tech stack and enterprise-level projects
- Work hours: 9:00~17:30 Monday to Friday

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

---

### Required Skills

- Around 5+ years of professional experience in C# and .NET ecosystem
  - Proven ability to manage full SDLC projects independently
  - Strong understanding of object-oriented design, architectural patterns, and modern development practices
  - Experience with RESTful APIs, relational databases (e.g., SQL Server), and unit testing
  - Ability to thrive in a fast-paced environment with minimal supervision
-
