Job Description

Our client is well-established Japanese multinational company within the electronic and ceramic component manufacturing industry is currently looking to hire an experienced **Production Manager** to lead and manage their production operations at their plant in Melaka.

Location to work: Batu Berendam Industrial Zone, Melaka

Job Responsibilities:

- Lead and supervise day-to-day production operations and ensure smooth running of all production lines
- Plan and execute production schedules (daily, weekly, monthly, annually)
- Manage production resources using the 4M (Man, Machine, Method, Material) optimization approach

- Monitor and control production costs while improving operational efficiency
- Uphold a safe and compliant working environment (SHE – Safety, Health, Environment)
- Ensure product quality and adherence to company SOPs, policies, and quality standards
- Identify and resolve any production or process-related issues with relevant teams
- Implement lean manufacturing principles across all lines
- Train, coach, and develop production operators and line leaders
- Monitor WIP (Work-in-Progress) and optimize line balancing and productivity
- Utilize systems and IoT tools to manage and track performance and resources

Job Requirements:

- Bachelor's Degree in Engineering or related field
- Minimum 5 years of experience in a Production Manager or Senior Production Executive role in a manufacturing environment
- Strong hands-on experience in mass production, quality control, safety, and cost management
- Knowledge in lean manufacturing, production planning, and resource optimization
- Familiar with System/IoT-based operations, and Material Requirements Planning (MRP)
- Good leadership, problem-solving, and communication skills
- Able to manage multiple production lines and implement process improvements effectively
