Job Description

Play a pivotal role as an NLP Data Scientist alongside like-minded scientists at the industry-leading AI tech company!

You will:

- Work closely with all teams to spearhead product design, implementation, and management, making sure that the company remains at the cutting edge of tech
- Build data collection, processing, and integration pipelines
- Develop NLP system evaluation methods,
- Conduct experiments to assess LLM model performance
- And more ...

Conditions:

- Full flex time with no core hours
- Hybrid work model

Required Skills

Requirements:

- Bachelor's degree in Statistics, Math, Data Science, or related field
- 3+ years' professional experience in NLP product analysis applications
- Practical experience with Python, R, SQL, etc.
- Experience with cloud tech (AWS, GCP, Azure, etc.)
- Fluent English

Nice to have:

- Proficiency in big data transformation using Python and SQL
- Prompt engineering experience for LLM models
- Phenomenal communication and interpersonal skills
- N2+ Japanese (not necessary, but a very big plus!)
