Job Description

Our client is a leading global manufacturer within the advanced materials and ceramic electronic components industry. They are seeking a highly experienced **Quality Manager** to oversee quality assurance and control functions within their production operations in Malaysia. This position plays a critical role in maintaining and enhancing product quality to meet stringent customer and regulatory standards.

Location to work: Batu Berendam Industrial Zone, Melaka

Job Responsibilities:

- Develop and implement quality control systems, policies, and procedures across the organization.
- Lead a team of quality control personnel — providing training, coaching, and daily guidance.

- Monitor and analyze quality data to detect issues, identify trends, and implement corrective actions.
- Coordinate with other departments to ensure quality objectives are met throughout production and development.
- Conduct regular quality audits and inspections to ensure compliance with internal and external standards.
- Ensure all quality documentation, records, and reports are accurate, updated, and audit-ready.
- Collaborate with R&D and production teams to ensure quality is embedded into new product development.
- Provide quality training to staff and promote a culture of continuous improvement.
- Stay updated with industry standards, regulatory changes, and new technologies relevant to quality management.

Job Requirements:

- Bachelor Degree in Mechanical/ Electrical/ Manufacturing Engineering, Quality Management or related field
- At least 5 years of working experience in Quality Assurance, Quality Control or a similar role
- Solid understanding of quality systems, regulatory standards, and manufacturing processes
- Proven experience in team leadership and cross functional collaboration
- Strong problem solving, analytical and decision-making skills
- Familiar with system-based quality control (e.g: QMS, ISO standards)
- Knowledge of IoT and software tools used in quality monitoring is a plus
